

Bristlebots or Vibrobots

Collect together all the materials:

1. Toothbrush head, coin battery, blu-tak or double-sided tape, vibrating motor

2. Place tape or blu-tak onto the top of the toothbrush head.

3. Stick vibrating motor onto tape or blu-tak.

4. Connect battery to motor, positive to positive.

5. Ready to race your Bristlebot.

Play with position of battery and motor to get directional movements required.
